

Diya Sharma

U.S. Citizen | d_sh@outlook.com | +1 (443) 779-0236 | www.linkedin.com/in/diyasharma5

Senior Computer Science major with a minor in Biology, specializing in artificial intelligence and human-computer interaction.
Experienced in both research and software development, with a focus on applying machine learning to user-facing products

EDUCATION

Georgia Institute of Technology

Atlanta, Georgia

B.S. Computer Science; Minor in Biology

Expected May 2027

Cumulative GPA: 3.7 | Dean's List 2023 – 2025 | Faculty Honors 2025 – Present

Relevant Coursework: Data Structures and Algorithms, Objects and Design, Introduction to Artificial Intelligence, Intro to Cognitive Science, User Interface Design, Research Methods: Human Factors and Human-Computer Interaction

WORK EXPERIENCE

WHOOOP

Boston, Massachusetts

Applied Machine Learning Science Co-op

January 2026 - Present

- Currently working on data science initiatives for a SaMD QMS-regulated Class I medical device, adhering to FDA standards.
- Leveraging Snowflake and EzDeploy to query, validate, and analyze large-scale physiological and product data.
- Conducting a series of exploratory data analysis of internal pipelines to evaluate performance and make product decisions.

University of Maryland School of Medicine, Blanpied Lab

Baltimore, Maryland

Data Science Intern

Summer 2024, October 2022 - April 2023

- Developed a multi-model classification system (SVM, Random Forest, Gradient Boosting) to differentiate synapses.
- Applied feature engineering, normalization, and dimensionality reduction techniques using SciKit-Learn and OpenAI.
- Automated data collection and image processing pipelines using a combination of Java, MATLAB, and Python, streamlining the lab's large-scale experiments and reducing manual workload.
- Performed immunochemistry staining and confocal microscopy imaging to collect thousands of data points.

Johns Hopkins University Applied Physics Laboratory

Laurel, Maryland

Mechanical Engineering Intern

June 2022 - March 2023

- Thought of project idea for a fully electronic triage tagging system, leading to acquisition of a \$20,000 grant.
- Led an three-person intern team in the design and development of a novel medical sensor component for the project.
- Presented research and sensor prototype at the 2023 IEEE Integrated STEM Education Conference.

SKILLS

Programming: Python · Java · C++ · MATLAB · Django · SQL · HTML/CSS · JavaScript · Git · GitHub · Agile/Scrum · VS Code · PyCharm · Cursor · Claude Code

Data Science & Analytics: Pandas · NumPy · SciPy · Matplotlib · Seaborn · Scikit-learn · PyTorch · OpenAI Gym · Jupyter Lab · Snowflake · Jira · Confluence

Campus Involvements: Campus Tour Guide · Grand Challenges LLC · Event Services Assistant · Tower Undergrad Research Paper (Editor) · Technique Newspaper Journalist · Medical Robotics · SynapseX

RESEARCH

Bio-Interfaced Translational Nanoengineering Lab

Atlanta, Georgia

Undergraduate Research Assistant

January 2024 – December 2025

- Used Jupyter Lab to preprocess EEG, EMG, GSR, ECG, PPG, and other physiological signals, applying filtering, artifact removal, normalization, and feature extraction to prepare clean signals for modeling.
- Trained and optimized deep BLSTM-LSTM networks on the preprocessed EEG data to achieve real-time stress detection.

PROJECTS

Beyond Barca Project, CS 3750 - Intro to UI

May 2025 - August 2025

- Collaborative design work to create a Figma-based app prototype helping users plan day trips from Barcelona.
- Applied design thinking, wireframing, and usability principles to translate user needs into intuitive UI flows.

Surgical Arm, GT Medical Robotics - Software Team

August 2023 - December 2025

- Employed image processing and computer vision using tools such as OpenCV and TensorFlow.
- Collaborated with a multidisciplinary team to enable robotic arm to autonomously locate and classify surgical tools.

Travel Photography Website and Blog

August 2025 - Present

- Designed and deployed a photography portfolio website using Next.js, Tailwind CSS, and Vercel.
